## **Standardized Testing Blues** **Crafted by: Zachary Ulry**

When the clock begins to count towards the end of the year  
All of my fears become clear  
The fear of being crowded into a room  
The fear of having to use a wooden pencil  
The fear of not being able to have my cellphone in my back pocket  
The fear that I am wasting my life away for no real purpose

Pure anxiety runs through my brain  
As I attempt to pass a test that pays no respect to the individuality of a person  
The uniformity cuts deep  
Am I an individual, or am I a sheep?

As the clock ticks by  
My anxiety is only brought on by more anxiety  
There is always another test around the corner  
    Watching  
    Waiting

I can only see the world through four letters  
    H A  
    E B  
    L C  
    P D

If what I do today constitutes my tomorrow  
Why am I spending it testing?  
It's a plague with no end  
A sickness that can injure yet not kill

Life only lives in two and half hour segments  
There is no escaping

## **Nightmares (Epic)** **By: Amanda Dudgeon**

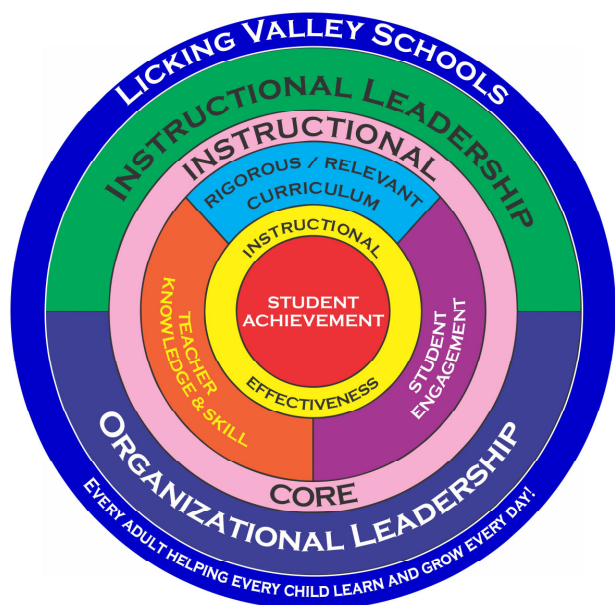

What are nightmares?  
Is it nothing more a thing of our imaginations?  
Or are they something more?  
Are they controlled by a single human thought?  
Or are they controlled by some higher being that is trying to tell you something?  
Or maybe they are just another escaping reality like a regular dream.  
Perhaps we will never know what brings up a nightmare.  
    Oh, well.  
    Good night.

# New Educational Options Program at LVHS

We are excited to announce that under our Educational Options Policy, the Licking Valley Schools is launching a new **Educational Options program**. This program will provide new and exciting opportunities for all LVHS students. We have partnered with ACE Digital Academy, an online curriculum and education provider to offer up to 200 online courses to our high school students. This program is designed to meet two basic needs. One need is to help the roughly 7% of our students who do not graduate each year. Many of these students are, for one reason or another, unable to succeed in the traditional high school instructional program and environment. This online option will provide them with an **alternative to the traditional high school** program and give them another avenue to earn their Licking Valley High School diploma. We would like to bring back to Licking Valley our students who are currently enrolled in other online, community and charter school programs, and students who have dropped out of LVHS but who really want a diploma from Licking Valley High School. If you know a former LV student who didn't graduate, please share this information with them. Licking Valley currently loses almost \$350,000.00 annually to community and charter schools such as Newark Digital Academy when our students drop out and enroll in those schools, and the vast majority of them never acquire a diploma of any kind.

The other need is to offer **additional internet-based elective courses** to all of our students. These electives include various foreign languages such as French, German, Japanese, Latin and Mandarin Chinese. There are also electives such as art history, business and technology, Microsoft Office Software courses, career exploration and various Advanced Placement (AP) courses not currently available at the school. There is also an online ACT Preparation course available through this program. We will also be able to offer **credit recovery** and **summer school** courses through the Educational Options program!

If you are interested in Educational Options, either to complete your high school diploma or for the elective options, please contact **Mrs. Aimee Twiggs**, Licking Valley High School teacher and Educational Options Coordinator, to take advantage of this exciting new educational opportunity. Mrs. Twigg's email address is [twiggsa@lickingvalley.k12.oh.us](mailto:twiggsa@lickingvalley.k12.oh.us). You may reach her by phone at 763-3721.

# Appreciate Teachers by Understanding What They Do

(Article by Mary Beth Hertz, *Edutopia Magazine*, April 24, 2014)

**Teacher Appreciation Day is May 5<sup>th</sup>!** As I attempt to briefly highlight some points in this article, I hope everyone understands that teaching is not what it was even 5-10 years ago. Teachers are expected to do so many things: tracking student data, resolving conflicts, integrating technology, mapping their teaching to standards, differentiating their instructional practices, grading homework, and of course testing, testing, testing. Their jobs are more demanding than ever. They must continually take part in professional development to upgrade and renew their certifications. They work very hard to plan and deliver lessons to make sure all their students have an opportunity to learn.

The best way to appreciate them is to understand what they do. Appreciate them for their hard work and their high level of expertise in a profession that often has a negative public perception. Treat them as a highly professional bunch that works very hard at what they do because they love kids and want to help them succeed.

When you get the chance, tell a teacher you appreciate them. Ask them about one of their favorite teaching strategies. Ask them why they got into teaching or about what they are most proud of when it comes to their students. Allow them to share the positive and professional aspects of their career.

Thank a teacher because they've earned it and deserve the recognition for a job well done!
